**Subject:** Total Or Dissolved Field Updates

Megan,

I've been working on trying to get data auditor rules implemented for the response.

Part of that is making sure analytical results for metals data properly denote if they represent Total or Dissolved.

Looking through your project you have about 1000 results for the 200.8 Metals (ICP/MS) and 200.7 Metals (ICP) that are not populated with the T or D.

On the next publish of the analytical project can you update the Total\_or\_Dissolved values for those where its missing?

This is very important so its clear when the data sees the data what type of result they are looking at.

Thanks,

Joe Schaefer
